Continuation of 11. does NOT place the application in condition for allowance because: Applicant's arguments with regards to independent claims 1-7, 10, 17, and 20-26 are not persuasive. Regarding applicant's argument that JP '673 does not disclose a "first base end fixation member" or a "first top end fixation member", note that the reinforcing member has a series of rings circumscribing the reinforcing member, said end rings consituting respective base end and top end fixation members. Regarding applicant's arguments that JP '690 does not disclose a SOLID wire rod, note that a solid wire rod is not being claimed. Regarding applicant's arguments that a base end width broadening part or base end fixation member are not found in the reinforced concrete structure, note that the claims do not have limitations drawn to that defined structure.
